Correction to: Online tools supporting the conduct and reporting of systematic reviews and systematic maps: a case study on CADIMA and review of existing tools

Christian Kohl1†‡, Emma J. McIntosh‡†, Stefan Unger1†, Neal R. Haddaway3, Steffen Kecke1, Joachim Schiemann1 and Ralf Wilhelm1

Correction to: Environ Evid (2018) 7:8

The authors wish to update information about the software DistillerSR in Tables 1 and 3 which we were alerted to following the publication of original article [1]. In addition to the analysis provided, DistillerSR does support protocol development (Pi) e.g. assistance to determine appropriate PICO elements, and critical appraisal (Cr) as ‘stages of the SR process supported.’ This information was not originally included in the assessment due to a lack of clarity on the service providers’ website. No further updates to this manuscript will be possible for this or other software, in line with the general disclaimer below.

General disclaimer:
The review of systematic review support software represents an independent assessment by EJ McIntosh based on publicly available information on each software package. This assessment represents an attempt to best capture information located via service providers’ websites, in academic publications, user manuals and via free trials or software demonstrations. Occasionally, relevant information was not publicly available or may have been difficult to access or interpret. This assessment does not represent the views or opinions of any of the software developers or service providers. The review of software was completed in mid-2017, readers should visit the software providers’ websites (linked in Table 1) to check for updates, for further information and to seek clarification where necessary.
